# ABOUT SUBLIMATION

## WHAT IS SUBLIMATION

Sublimation is a process of transforming of inks that, upon coming into contact with heat, pass from the solid state to gaseous state (sublimate). The transformation allows the ink to bond in a stable manner to the polyester surface.

## ADVANTAGES OF SUBLIMATION

Once the color has combined with the polyester in a permanent way, it will become resistant to scratches and decay of the color. The end result provides a surface perfect without relief or thickness, breathable, washable, durable and that preserves the inherent texture of the fabric used. Sublimation printing is convenient in the case of application of multiple prints.

## SPECIAL ATTENTIONS TO THE PRODUCT

In order not to reactivate the sublimation process which would result in a possible migration of color, it is recommended to avoid washing at high temperatures and the use of the dryer.

# HOW TO CUSTOM

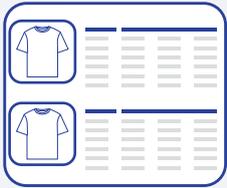

DESIGN BRIEF

Start by requesting the design you want for your team by downloading the form at the following link:

**[mizuno.it/ARTWORK\\_REQUEST.pdf](https://mizuno.it/ARTWORK_REQUEST.pdf)**

Inside, you will find all the instructions you need to fill it in correctly. Once you have done so, send it to your agent or the Teamwear office.

ORDER FORM

Once you have decided on the design, click on the following link to complete your order with sizes and quantities:

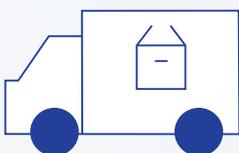

**[mizuno.it/ORDER\\_FORM.pdf](https://mizuno.it/ORDER_FORM.pdf)**

Follow the instructions to fill in the form correctly and send it to your agent or the Teamwear office.

CONTACTS

Once your request has been processed, Mizuno will send you an **order confirmation**.

DELIVERY

Shortly before delivery, you will be provided with an estimated delivery date and the shipment **tracking number**.

# DIFFERENT LOGO PRINTS

Mizuno offers various options for applying logos to garments. Patches can be made from various materials and with different finishes. The minimum order is 300 pieces per badge. To proceed, we need to receive the badge in vector format; we will then provide a quote with the cost per piece and the production time frame.

## SUBLIMATED

Digitally printed design on a paper transferred onto (usually) white polyester material using high temperature which helps to integrate ink to the fabric

## EMBROIDERY

Traditionally used for club crest on inline and cut and sewn garments.

## PRINT

High definition print, is ideal for sponsor logos, names and numbers.

## HEAT SEALED

Thermo-adhesive applications, available in few different materials.

## USEFUL INFORMATION

### ARTWORK REQUEST

Each project in the 'concept' stage can be revised for free up to a maximum of **three times**. From the fourth revision onwards, a surcharge of **€25** will be applied for each subsequent request. 'Revision' means requesting a new version of the project. Multiple changes may be requested in a single revision.

**Logos must be provided in high resolution, in .ai, .svg, .pdf or .eps formats.** If these files are not available, vectorisation can be performed from an image. This service is available at a cost of **€30** per logo.

### MINIMUM ORDER QUANTITY

The minimum quantity that can be produced is 10 pieces per reference (with the exception of volleyball liberos and goalkeepers in football and handball).

**Orders of less than 10 pieces per reference will incur a 50% surcharge on the unit price.**

The Mizuno team recommends purchasing extra items in your first order to ensure you have sufficient stock.

### CONTACTS
